AngularJS
KnockoutJS

Experience

2013.09 - Current
San Francisco, CA

Adhusky - Designer and Front-end Developer

Adhusky provides one stop Facebook ad solution for small business owners. As of April 2015 Adhusky helped more than 2000 small business owners to reach out to their customers by Facebook.

About

I first met two founders while working at a StartX portfolio company and remotely helped the team since September 2013. On January 2015, I moved to San Francisco to join the team as soon as I finished my degree.

Responsibilities

Redesigned the company website (adhusky.com) and web application (app.adhusky.com) while defining task flows, design patterns, site maps and building wireframes and prototypes.

Developed the frontend of the application using KnockoutJS and AngularJS.
Utilized Bootstrap as a framework.

2014.05 - 2014.08
Vancouver, BC

Samsung Electronics Canada - User Experience Designer

Worked with UX researchers, interaction designers, visual designers and front-end engineers in improving the website and applications of Samsung KNOX (a mobile security solution and mobile device management software).

Responsibilities

Designed tasks and questionnaires for the usability study.
Moderated the usability study with participants.
Compiled, analyzed, and presented research findings - both quantitative and qualitative.
Made video clips of the study to show research findings.
Built prototypes that was used in 23 usability studies.
Designed internal UX research newsletter.

2013.06 - 2013.08
Palo Alto, CA

Linknovate - Designer

Linknovate is a startup helping companies reduce their time-to-market cycles and to boost their R&D capabilities by building ecosystems, such as search engines.

About

Worked while the company was in the StartX accelerator program.

Responsibilities

Helped with designing and developing website from the initial stage.
Designed and built the frontend of the company website.
Created wireframes and prototypes.

Awards

Wix Hackathon San Francisco - Winning Team

Integrated simple Facebook advertising process into the Wix Dashboard.

Startup Weekend Vancouver 2014 - Winners of the Spring Prize for Best Purpose-driven Startup and Third Place Overall

Formed a team called Votely, where we pitched an idea of developing a tool that allows young, disengaged voters to rapidly and intuitively get matched with political candidates whose views and priorities best align with their own.
